For years, Vespa has won over entire generations with its charisma that transmits freedom and its unconventional style. In its intense history, Vespa has been the protagonist of cultural and social revolutions, musical and custom movements, cinematic films, works of art and songs. It has dictated fashion and trends and it has transcended frontiers to conquer the entire world, an icon of unique design and values of environmental awareness and independence.
Providing a changing world with two wheels and an engine, the Vespa Primavera first made its début in the late 1960s, heralding in revolutionary new ideas. Echoing its epic success, Vespa Primavera now renews that legend, reinterpreting it in fresh and light lines, becoming an example of style and technology. Vespa Primavera once again becomes a protagonist of its times, inviting you to participate in a new revolution: this Vespa “small body” demonstrates all of its liveliness both in city traffic conditions and on the open road, giving you maximum riding pleasure. Thanks to the compact, peppy and highly technological i-get engine (Italian green experience technology), enclosed in a livery that expresses all the dynamic character written in its DNA, Vespa gives its travelling spirit a full say, transforming every urban outing into a small adventure.

Verde Relax
Heir to that generation of sporty Vespas that invaded the European streets in the roaring Sixties with a quick small body, Vespa Sprint was born to make your everyday commute fun. Rich in technologically advanced features and designed to achieve stability and handling levels at the top of its class, it is the modern reinterpretation of pluck and determination on the road. It is easy to ride thanks to the innovative engines in the i-get (Italian Green Experience Technology) family that interpret a new design philosophy under the banner of smoothness and comfort.

The TFT dashboard is the interface for the VESPA MIA connectivity system, which allows for complete communication between rider and vehicle. A Bluetooth connection and the dedicated Vespa app (which can be downloaded from the App Store or Google Play) transform the display into an extension of the smartphone, allowing the rider to answer calls, view message notifications, and activate voice commands and music playlists. On Vespa GTS SuperTech, the display also serves as a navigation system, accompanying the rider along the route, pre-set in the Vespa app, with directions in the form of pictograms.

*The navigation function is available only on GTS SuperTech and is free of charge for three years beginning from the first time it is used. Customers can manage the optional renewal at their own expense through in-app purchase.
(VESPA PRIMAVERA)RED was born out of collaboration with (RED), which the Piaggio Group has supported since 2017. Founded by Bono and Bobby Shriver in 2006, the goal of (RED) is to encourage companies to allocate a sustainable cash flow to the Global Fund for the fight against AIDS and Covid-19, as well as creating public awareness and keeping the issue at the centre of attention. The characteristic Red colour scheme, which elegantly clothes the entire body, also colours the wheel rims and the ergonomic saddle, made in soft Nabuk, making (VESPA PRIMAVERA)RED truly unique and recognisable at a glance.

For every (VESPA PRIMAVERA)RED sold, the Piaggio Group donates part of the proceeds to the Global Fund to support (RED) in the fight against AIDS and Covid-19.

Vespa is proud to be a partner of (RED).
The special Vespa Racing Sixties equipment packages are a full immersion in the unforgettable mood of the sixties, the legendary era of competitions that made Vespa an icon. A blend of adrenaline and gentleman-rider style embodies the intrinsic charm of sportiness, the thrill of speed and the competitive spirit. The inspiration was drawn from the passion for vehicle customisation between performance and aesthetics. Vespa GTS Super chooses a two-coloured stable: the classic and impeccable elegance of green with yellow details, and white and red for a dynamic, current and slightly eccentric look.
